ABOUT ME

A full-time Information Security student at Zhejiang University with a strong interest in Web Application Penetration Testing and cloud security. I actively participate in CTF competitions and work on security-related projects to strengthen my practical skills.

EDUCATION

Zhejiang University

2023-2027

Bachelor of Engineering in Computer Science and Technology

EXPERIENCES

CTF Competitions

2024-Present

Participated in picoCTF, ZJUCTF, and Cyber Jawara International

Security Labs

HackTheBox

- Network enumeration and service discovery
- Vulnerability identification and exploitation
- Privilege escalation techniques in Linux environments

PROJECTS

NOLly – Agentic AI Network Mapper (In Progress)

- AI-assisted network reconnaissance tool leveraging Nmap for automated scanning workflows
- Implements recursive scanning based on discovered services & open ports
- Controls multiple Dockerized scanning services within a Kubernetes cluster

SKILLS

Programming

- Python
- C

Security Tools

- Burp Suite, Caido, ZAP
- Nessus
- Wireshark
- SQLmap
- Gobuster, Dirbuster
- Hydra, Hashcat

LANGUAGES

- Indonesian (Native)
- English (Full professional proficiency)
- Mandarin (Professional working proficiency)
